Hi Debra, in answer to your question: how do you clean the barges before you return them? The barges are inspected when we receive them to make sure there is no contamination in them. We completely clean the barges by washing them and discharging the residue to our drying pad and discharging any water to the City of Richmond Sanitary Sewer System. The barges are then inspected before we return them to the dredging contractors to make sure they are again clean. Both inspections are done by an independent contractor. I can send you the inspection forms when I receive them if you wish.
The contact person for the dredging at LRT will be Jim Holland.

If you have any other questions, please call or e-mail me. I will always be available by cell phone - 510-703-6990.
Jim

This Email message contained an attachment named
  image001.jpg
which may be a computer program. This attached computer program could
contain a computer virus which could cause harm to EPA's computers,
network, and data.  The attachment has been deleted.

This was done to limit the distribution of computer viruses introduced
into the EPA network.  EPA is deleting all computer program attachments
sent from the Internet into the agency via Email.

If the message sender is known and the attachment was legitimate, you
should contact the sender and request that they rename the file name
extension and resend the Email with the renamed attachment.  After
receiving the revised Email, containing the renamed attachment, you can
rename the file extension to its correct name.

For further information, please contact the EPA Call Center at
(866) 411-4EPA (4372). The TDD number is (866) 489-4900.
